

ARTHA TYANI MINERAL
DRILLING & EXPLORATION

Company Profile

Profile

Exploring Resources,
Building the Future

Presented by:

A Legacy in Mining Excellence

PT Artha Tani Mineral (ATM) provides integrated mineral exploration services, combining technical expertise, field experience, and a structured operational approach to support reliable and efficient exploration projects across Indonesia.

- Specialized in mineral exploration drilling and geological services
- Strong field execution supported by experienced technical teams
- Strategic operational coverage across key mining regions
- Structured, reliable, and client-focused approach
- Prepared for domestic and future international projects

Vision for the Future

Strengthening our role as a reliable mineral exploration services partner through precision, safety, and sustainable operational practices.

Vision

ATM is committed to delivering accurate and reliable mineral exploration services through professional execution, structured processes, and responsible operations, while building long-term partnerships and empowering local communities.

Mission

To deliver accurate and timely mineral exploration services through experienced teams, structured processes, and responsible operational standards.

Commitment

Focused on safety, environmental care, and industry compliance, ensuring reliable operations in every project.

Approach

Using a method that emphasizes precision, efficiency, and clear communication during project execution.

Coal & Mineral Drilling Services

ATM has developed various drilling techniques like touch and full coring to assess coal and minerals. Each hole provides a lithological profile in a client report.

Geological Mapping & Survey

Detailed geological mapping and topographical surveys to identify mineral potential, support exploration planning, and improve decision-making accuracy.

Well Site Logging

Geophysics logging is crucial for assessing rock seam thickness and improving drilling accuracy. ATM offers gamma ray, caliper, and density logging services for precise rock analysis and effective borehole visualization.

Geophysical Services

We offer exceptional geophysical services, focusing on Resistivity, Magnetic, Gravity, and Seismic techniques for projects from exploration to engineering investigations.

Geodesy & Measurement Services

High-precision geodetic and measurement services to support exploration accuracy, area validation, and project documentation.

Collaboration & Consulting

High-precision geodetic and measurement services to support exploration accuracy, area validation, and project documentation.

Core Mining Services

Our Achievements

PT Artha Tani Mineral has been involved in multiple mineral exploration and drilling projects across Indonesia, with a strong presence in nickel and mineral mining sectors, supported by long-term client relationships and regional field experience.

50+ Exploration Projects

Nickel Mining Projects

- Sulawesi (Central, Southeast, South)
- Halmahera, North Maluku
- Papua
- Others

Mineral Exploration & Drilling

- Geological Mapping
- Shallow Drilling
- Geophysical & Geodesy Surveys

Regional & Multisite Projects

- Kalimantan (East, South, Central)
- Sulawesi
- Papua
- Others

Projects executed across remote and strategic mining areas with diverse geological conditions.

Sustainable Exploration Practices

ATM is committed to responsible exploration practices by integrating safety, environmental awareness, and community consideration throughout its drilling and exploration activities.

Environmentally Responsible Operations

Minimize environmental impact in exploration and drilling with proper procedures and controls.

Site Rehabilitation & Land Care

Restoring sites safely post-completion per regulations and client specs.

Water & Waste Management

Responsible water use and waste management are vital to protect environments during exploration and drilling.

Local Community Engagement

Supporting Communities: Jobs, Collaboration, Respect.

Skilled Experts in Explore Mineral

Alexander Aronowitz
Lead Engineer

Driving innovation and safety in mining operations through modern technologies and proven expertise.

Aaron Loeb
Senior Geologist

Ensuring accurate exploration, resource management, and sustainable geological planning for long-term value.

Estelle Darcy
Project Manager

Overseeing large-scale mining projects with efficiency, precision, and strong leadership.

sharon Shah
Operations Specialist

Maintaining on-site operations with dedication, technical knowledge, and a focus on safety.

10+ Years
Experience

50+ Exploration
Projects

15+ Mining
Partners

Trusted Collaboration & Projects

ATM, with over 10 years of experience, has completed more than 50 projects, including 15 mining projects. It partners with reliable local vendors, logistics providers, and technical support teams to guarantee seamless exploration and drilling activities at various project sites.
